Intuitive Online Reporting

Instantly access the critical information you need to make well-informed business decisions

A Long List of Built-in Reports Are Available, Including...

Pending Batch Report

The Pending Batch Report shows transactions that have been received and are awaiting processing.

Transaction Report

The Transaction Report provides a summary view of all transactions that have been processed within a specified date range and their current status.

Settlement Report

The Settlement Report details all transactions and returns that have settled to user's bank account simplifying reconciliation.

Returns Report

The Returns Report shows all returns that have been received during a specified date range and the reason they were returned.

Notification of Change (NOC) Report

The Notification of Change report shows changes to account information that have been requested by customers' banks (such as when a customer converts from a checking to savings account) making it easy to maintain accurate customer account records.
